75 crore vaccine doses a global beacon in fight against Covid-19

By Mansukh Mandaviya

It is a day to rejoice! As India prepares to celebrate the 75th anniversary of Independence, we have another reason to celebrate. Having delivered a landmark 75 crore Covid-19 vaccine doses under the visionary leadership of Prime Minister Narendra Modi, India is well on its way to vaccinating the entire adult population soon. If there was ever a measure of progress by a country that has harnessed its science, R&D, human resources of health workers, doctors, nurses and medical staff, it is this milestone.

What makes the achievement more significant in this 75th year of Independence is that almost all these vaccines have been manufactured in India by our scientists in a relatively short span of time. India has a proven track record of strong pharma and vaccine-manufacturing capabilities. The first indigenous Covid-19 vaccine, Covaxin, led by ICMR in collaboration with Bharat Biotech, Serum Institute's Covishield, Sputnik on private hospitals, have been rolled out across the country. Zostix, Cadila's ZycovD, the world's first place DNA vaccine, has received EUA, and many other candidates from Indian companies are in advanced stages of trials. Despite challenges in terms of a large population and at-risk groups, India has done remarkably well in managing the Covid-19 pandemic. India was quick to identify

STEADY CLIMB: Healthcare workers travel to inoculate shepherds during a vaccination drive in south Kashmir's Anantnag district in June

gaps and rapidly provided innovative solutions for surveillance and testing. Our government ramped up testing capacity, diagnostic centres and supply of critical equipment and medicines. With ICMR's rapid intervention, India has more than 2,500 Covid testing labs, more than 54 million samples have been tested, 1.6 million tests are conducted every day. The deployment of biotechnology (DIT) has launched pan-India 1000 SARS-CoV-2 RNA genome sequencing programme. Our Covid-19 vaccination drive has shown the strength of India's vaccine manufacturing capabilities for inoculating such a large population of which many reside in the remotest of villages. With the massive support of state governments, India has been able to accelerate and expand its Covid-19 vaccination drive. The promise

made for our PM of free vaccines for all is being met by the Centre that is supporting all states and UTs with free of-cost vaccines. We are administering an average of 76.45 lakh (September 21) Covid-19 vaccine doses per day. We have administered more than 1 crore doses on several days recently. This is a figure larger than the entire population of several nations. Nearly 60% of India's adult population has now been vaccinated with at least one dose of the Covid-19 vaccine. Almost 1% have been administered both the doses. More importantly, today over 97% of our elderly and 68% of those who are 45-69 years have received at least one dose of the vaccine. It is encouraging to see states like HP, Sikkim, Dadra & Nagar Haveli, Daman & Diu and Goa having vaccinated 100% of eligible population with the

first dose of Covid-19 vaccine. UP, Gujarat, Karnataka, MP and Haryana are administering Covid-19 vaccines faster than some leading nations of the world. It is impressive that the digital vaccination platform CoWin has been scaled up to deliver digital vaccine certificates for all those who are vaccinated.

These vaccination numbers have been made possible not only because of the efforts of governments, but by the tireless hard work of our scientists, doctors, healthcare workers, paramedical staff – the nation's Covid warriors. I join the rest of the nation in congratulating them for their selfless dedication, spirit and commitment. Special acknowledgement is needed for our ASHAs, ANMs, Anganwadi workers and women's Self Help Groups (SHGs) for their contributions in the vaccination drive.

As we rejoice successes achieved thus far, we should not let complacency get the better of us. The increasing rate of coronavirus cases in states like Kerala and Maharashtra is a real concern. As new variants of the Covid-19 virus emerge, we must stay vigilant and not drop our guard. India with its 'samanyik' has been able to stand tall against Covid-19. All Indians should take pride and enthusiastically participate in the world's largest and fastest vaccination drive.

(The writer is Union Minister for Health & Family Welfare, and chemicals & fertilizers)

75 Crore Vaccinations

Dr Mansukh Mandaviya wrote an article on the occasion of India's achievement of 75 crore COVID-19 vaccine doses.

September 15

National Florence Nightingale Awards

Dr Mansukh Mandaviya attended the National Florence Nightingale Awards ceremony in honour of the nurses' contribution as frontline workers.

Inauguration of facilities at Safdarjung Hospital

Dr Mansukh Mandaviya inaugurated Oxygen PSA Plant, Makeshift COVID Hospital, Child Abuse Protection Centre and Elder Abuse Care Centre at Safdarjung Hospital.

Mobile Medical Units

Dr Mansukh Mandaviya dispatched 15 Mobile Medical Units to Himachal Pradesh to provide medical services in inaccessible regions.

September 17

World Safety Day

Dr Mansukh Mandaviya addressed an event on World Patient Safety Day, on the theme, 'Safety in Maternal and New-born care'.

September 18

Srinagar Airport

Dr Mansukh Mandaviya inspected the COVID-19 testing arrangements at Srinagar airport, to ensure that the facilities are smooth and efficient for people's convenience.

Sub District Hospital Sopore, J&K

Dr Mansukh Mandaviya inaugurated the Pradhan Mantri Bhartiya Janaushdhi Kendra, CT Scan Machine and other facilities at the Sub District Hospital Sopore, J&K.

GMC Baramulla, J&K

Dr Mansukh Mandaviya visited GMC Baramulla, J&K, and inaugurated a 50-bedded portable health care unit to enhance medical facilities in remote areas. Also, at the venue, inaugurated an exhibition on New Medical Colleges.

WELCOMES
SHRI MANSUKH MANDAVIYA

Hon'ble Minister of Health and Family Welfare & Minister of Chemicals and Fertilizers, Govt of India

Indore Achieving New Records

The first dose of COVID-19 vaccine reached 100% of citizens of Indore!

इंदौर में सौ फीसद लक्षित आबादी को मिली टीके की पहली खुराक

इंदौर, 31 अगस्त (भाषा)।

मध्य प्रदेश में कोविड-19 से सबसे ज्यादा प्रभावित रहे इंदौर जिले ने महामारी के खिलाफ टीकाकरण का अहम मुकाम मंगलवार को हासिल कर लिया। जिले में 18 साल से ज्यादा उम्र वाले सभी लक्षित लोगों को महामारी रोधी टीके की पहली खुराक दे दी गई है।

अधिकारियों के मुताबिक, साढ़े सात महीनों के अभियान के बाद इंदौर में 18 साल से ज्यादा उम्र वाले सभी लक्षित लोगों को महामारी रोधी टीके की पहली खुराक दे दी गई है और देश भर में 10 लाख से ज्यादा आबादी वाले जिलों में यह मुकाम हासिल करने में इंदौर अक्ल रहा है। जिलाधिकारी मनीष सिंह ने बताया कि हमने जिले में 28,07,559 पात्र लोगों को कोविड-19 रोधी टीका लगाने का लक्ष्य तय किया था। अब तक हम जिले के 28,08,212 नागरिकों को टीके की पहली खुराक दे चुके हैं।

66 फीसद बालिग आबादी को एक खुराक लगी

जनसत्ता ब्यूरो
नई दिल्ली, 23 सितंबर।

केंद्रीय स्वास्थ्य मंत्रालय ने गुरुवार को बताया कि देश की 66 फीसद व्यस्क नागरिकों को कोरोना विषाणु रोधी टीके की एक खुराक लग चुकी है। वहीं, 23 फीसद बालिग लोगों को टीकाकरण पूर्ण हो गया है यानी उन्हें टीके की दोनों खुराक लग चुकी हैं। देश में गुरुवार की शाम सात बजे तक 84.08 करोड़ खुराक लग चुकी थीं।

केंद्रीय स्वास्थ्य सचिव राजेश भूषण ने संवाददाता सम्मेलन में बताया कि देश में 66 फीसद बालिग आबादी को एक खुराक और 23 फीसद वयस्क लोगों को दोनों खुराक लग चुकी हैं। उन्होंने बताया कि छह राज्यों और केंद्रशासित प्रदेशों में 100 फीसद आबादी को

कोरोना रोधी टीके की एक खुराक लग चुकी है। इनमें लक्षद्वीप, चंडीगढ़, गोवा, हिमाचल प्रदेश, अंडमान निकोबार द्वीप समूह और सिक्किम शामिल हैं। वहीं, चार राज्यों और केंद्रशासित प्रदेशों में 90 फीसद से अधिक व्यस्क लोगों को एक खुराक लग चुकी है। इनमें दादरा नागर हवेली, केरल, लद्दाख और उत्तराखंड शामिल हैं।

सचिव ने कहा कि कोरोना रोधी टीकों में 63.7 फीसद ग्रामीण क्षेत्रों में लगाए गए हैं और 35.4 फीसद शहरी क्षेत्रों में लगाए गए हैं। उन्होंने बताया कि कुल 68.2 लाख खुराक (करीब 0.95 फीसद) ऐसे कोरोना टीकाकरण केंद्रों पर दी गईं जिन्हें ग्रामीण या शहरी क्षेत्र के तौर पर चिन्हित नहीं किया गया। अब तक लगी खुराकों में 52.2 फीसद पुरुषों को और 47.8 फीसद महिलाओं को लगाई गई।

66% of Population Covered with Vaccination

The first dose of corona vaccine has been administered to more than 66% of the adult population of India.

80 Crore Vaccinations

India administers 80 crore vaccine doses.
